

Round-O

Write multiples of 10 (10, 20, 30, 40... to 100) anywhere you want on the game board. You can write numbers more than once so you fill every square with a number.

Spin a 1-9 spinner two times to create a two-digit number.

Round your number to the nearest ten and cover that multiple of ten on your game board.

The first one to cover 5 in a row wins!
