

## **Write as You Read Science: Guidelines for Students**

1. Underline the main ideas or topics.
2. Underline the parts you want to remember.
3. Make a mark next to the parts you don't understand.
4. Highlight the parts you find interesting.
5. Circle the parts you agree with.
6. Underline the parts your teacher wants you to know.
7. Write notes about information you want to remember to remind yourself why it is important to you.
8. Write questions about information you do not understand.
9. Write notes about your thoughts and feelings.
10. Write a short summary of the reading.
11. Write definitions of, or sentences with, words you do not know.
