

<b>Writing Narrative Procedures and Lab Reports: A Guide for Students</b>	
<b>What was I looking for?</b>	Describe the research question you were trying to answer or the prediction or hypothesis you were testing.
<b>How did I look for it?</b>	Describe what you did to answer the research question or test the prediction or hypothesis. Include a description of the method and materials you used.
<b>What did I find?</b>	Describe any observations you made and the data you collected.
<b>What does this mean?</b>	Formulate a conclusion based on the data you collected. Discuss your predictions and their accuracy and how well the data supported your hypothesis.
