

Online Tools for Analyzing Sources and Using Information Ethically

- Two organizations have outlined standards to guide thoughtful and effective use of electronic information:
 - the American Association of School Librarians' Standards for the 21st-Century Learner at ala.org
 - and
 - the International Society for Technology in Education's National Educational Technology Standards at iste.org/standards
- Big 6 and Super 3 also offer good frameworks for developing your kids' research skills. Check them both out at www.big6.com.
- Another great resource—for you and your students—for learning how to evaluate sites is the University of California at Berkeley Library's Finding Information on the Internet: A Tutorial at www.lib.berkeley.edu/TeachingLib/Guides/Internet/FindInfo.html.
- Finally, Phil Bradley's site, philb.com/fakesites.htm, offers a collection of fake sites to aid students in evaluating Internet resources.
